- Now More Intuitive and More Convenient

The TOP screen is laid out panel-style with large icons, allowing more intuitive operation. The items on the setup screen have also been scaled down to give a simple design. Two scanning methods are available to satisfy a variety of needs including adhoc and daily scanning. As well as "Standard Scanning" where scanning mode and output mode can be separately configured, there is "Scanning Shortcut" where the specific scanning mode and output method are preconfigured, allowing one-click operation. It's also possible to edit scanned images, eliminating the need to redo a scan if the scanned data differs from the image that you want to save. What's more, you can scan to up to three outputs concurrently.
