\*1 : Certain models may become compatible by updating the firmware.  
 \*2 : Modeling flash is possible by pressing the test flash button with the models without depth-of-field preview button (by Custom Function setting).  
 \*3 : Possible with the AI.B Full-auto distance measurement start button  
 \*4 : Not supporting the [P.Fn-08-0] operation by double-clicking of the shutter button, but the operation possible with [P.Fn-08-1: AUTO].  
 \*5 : Auto bounce will operate only when "Depth-of-field preview" function is assigned to the M-Fn button or movie shooting button.

Speedlite 470EX-AI Major Function Compatibility with EOS Film Cameras: Edition 01
