

MDS Cloud Transforming Fleet Management

Managing a large fleet of print devices can be tedious. Thankfully, with MDS (Managed Document Services) Cloud, you can leave the fleet management to Canon and focus on your core business.

Beyond print management, Canon aims to enhance your entire fleet management strategy. Keeping your printing assets working perfectly and understanding your print usages, we help you achieve greater cost-savings through optimal deployment and management.

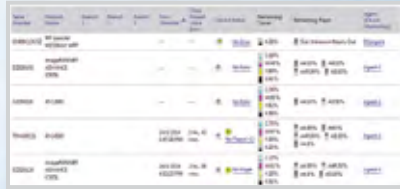

MDS Cloud is a total fleet management platform that enhances device availability, provides valuable management information and facilitates continuous fleet optimisation.

Simplified Fleet Management

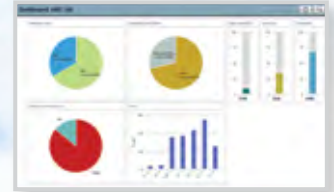

MDS Cloud automates the discovery of networked print devices and gathers information from those devices in a timely manner. Supporting every networked printer make and model* in your fleet and administrated by your Canon MDS service team, information on printer status, consumables level, print usage, and even error notifications, can be readily available. This enables your print devices to be effectively managed, ensuring maximum availability and convenience.

* Information availability may vary depending on device type and model.

Dashboard for Fleet Clarity

Critical information at the right time allows you to decide with agility. With MDS Cloud customer dashboard, information of the fleet and print usages are summarised into visual charts for easy understanding.

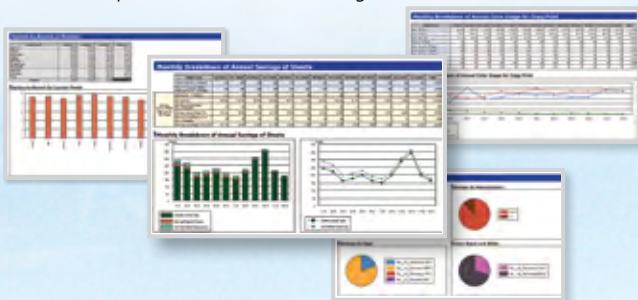

Providing device types breakdown, visibility into print consumption and more, you can have information at your fingertips for quick and decisive fact-based business recommendations.

Greater Optimisation Through Usage Analytics and Reporting

Analyse fleet information and print usages to gain greater insights into the model mix, usage volumes, print savings potential, service performance level, and much more, all within the published report.

Available from the customer portal, you can download the reports at your convenience. Together with consultancy from our experienced Canon service consultants, you can be sure of an effectively managed fleet for higher level of optimisation and cost-savings.

Flexible Service Performance Metrics

Every business environment is unique. Your service level requirements too, should flexibly fit your business. Using MDS Cloud, current service performance can be measured against your customised set of service level metrics.

We ensure that service levels are constantly met or exceeded, and that your print fleet is continuously managed for optimal value.

Scalable Platform That Grows with Your Business

Designed for scalability, the MDS Cloud can be configured to accommodate accordingly, as your business grows.

Whether your organisation adds new devices, branches, or even oversea locations, the MDS Cloud is designed to effectively manage and expand together with your business.

To ensure a comprehensive fleet management initiative and continual service optimisation for your business, speak with your Canon representative today.
