REIMAGINE **Optical Excellence**

The award-winning EOS R mirrorless imaging system stands at the forefront of Canon's technological innovations in imaging. Designed for professionals who require only the best, the EOS R System continues to innovate and adapt to the needs of photographers through the RF mount, having developed a reputation for delivering optical excellence and incredible future-proof performance.

The EOS R System features a superior line-up of powerful cameras equipped with CMOS sensors, state-of-the-art technology and enhanced ergonomics for high-performance still and video captures.

Paired with impressive RF lenses and RF extenders exclusively designed for the EOS R System, it provides stunning photographic results for any creative pursuit while providing versatility through compact designs and advanced features.

Additionally, mount adapters also allow for seamless compatibility with EF and EF-S lenses, providing for easier integration with the wider EOS ecosystem for improved flexibility and creative capabilities.

Reinagine Optical Excellence

EOS R Technologies

An award-winning performance. The EOS R System is designed around the incredibly versatile RF mount, enabling a whole array of different possibilities with improved lenses that deliver greater optical performance. Faster communication speeds between the camera and lens are also enabled, facilitating superior autofocus, image stabilisation and optimisation for delivering outstanding creative results.

HDR Technology

The EOS R System's high dynamic range (HDR) capabilities allow for images to be rendered in 10-bit HDR PQ, providing stunning gradations and a greater dynamic range visually, which comes in useful for high contrast scenes. Features like Auto Lighting Optimizer and Highlight Tone Priority can also be paired with HDR PQ for enhanced gradation. Through the HDR mode, users can select either Dynamic Range Priority or Moving Subject Priority depending on the nature of their images for easier capture of HDR PQ images.

USB Charging

Canon EOS R System cameras allow for effortless battery charging through the USB-C port with a compatible USB Power Adapter or a power bank.

New RF Mount

At the heart of the EOS R System lies the amazing RF mount. It's designed to deliver the ideal combination of speed, durability and flexibility in optical design for excellent performance and future system expansion, plus compatibility with an exclusive and ever-growing line-up of RF lenses.

54mm Large Diameter

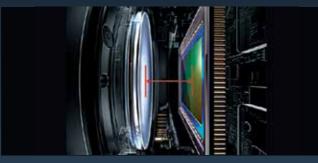

The new RF mount retains the same large 54mm diameter as the existing Canon EF mount, and thanks to the mirrorless structure of EOS R System cameras, the rear lens element can be much closer to the image sensor. Instead of additional optical engineering requirements to shift the optical system to avoid the mirror in a DSLR camera, the EOS R system offers more flexibility in lens design to prioritise optical performance, thus improving performance as well as allowing RF lenses to be more compact and lightweight.

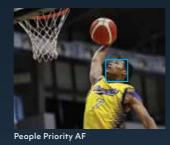

Data Transmission Through 12-pin Electrodes

When compared with the 8-pin EF mount, the 12-pin connection between the camera and lens means communication at a higher speed with larger amounts of data transfer, enabling incredibly fast autofocus (AF), high image stabilisation (IS) and image optimisation. It's a system designed to expedite operations that's ready for future expansions.

20mm Flange Focal Distance

The flange focal distance from the RF mount to the image sensor is 20mm. This allows the rear element of RF lenses to be larger in diameter, thus improving image quality at the corners and at the edge of the frame. Larger rear elements mean front elements can be smaller, meaning lesser refraction and bending of light rays within the lens, enhancing optical performance.

EOS iTR AF X

The EOS R System features the EOS iTR AF X (Intelligent Tracking & Recognition Autofocus), an advanced algorithm powered by deep learning technology, which allows for automatic detection and tracking of dynamic subjects such as humans, animals and vehicles. Enhancements to detection technology allow for faces and eyes to be detected even when covered up by glasses, helmets or masks.

Re Priority Animal Priority Vehicl

Versatile and High-Quality Movie-Making

With the introduction of innovative video technologies from the Cinema EOS System into the EOS R System, high-quality filmmaking and vlogging are made simple. With up to 8K video recording capabilities alongside access to professional tools such as Canon Log 3, False Colour and Zebra Display for advanced exposure correction, HDMI Output and more, greater video outputs and results can be achieved with ease. VR180 video recording is also now possible on select cameras.

Silent Shutter

EOS R System cameras are capable of shooting silently when required in certain situations by using the Silent Shutter mode, which utilises the sensor's electronic shutter instead of the mechanical shutter for photo taking.

Vari-Angle LCD

The flexible vari-angle LCD panel enables flexibility with shooting, allowing shots to be taken from high or low angles and in both vertical and horizontal orientations, alongside providing easy access to settings and other camera functions via simple touchscreen controls.

Multi-Function Shoe

The new Multi-Function Shoe found on newer EOS R System cameras acts as a power supply for additional camera accessories affixed upon it. High-speed data communication is also enabled, allowing audio accessories such as microphones and smartphone connectivity devices to be compatible with cameras while functioning efficiently.

Seamless Compatibility with EF/EF-S Lenses

Mount adapters deliver seamless connections between the EOS R System cameras and EF/EF-S lenses with all functions intact. Offering L-Series-level weather and dust sealing, the mount adapters are even compatible with EF extenders, such as the Extender EF 1.4x III to extend your camera's optical reach. This seamless compatibility with the EF lenses allows for easy integration of EF users into the EOS R System.

[FULL FRAME]

EOS R3

Built to deliver maximum performance, the EOS R3 is commonly used by professionals around the globe for major sporting events, press reporting and other situations that demand only the best in camera performance. With its high-quality movie making and photographic capabilities, powerful autofocusing capabilities alongside durable design, it is the ideal choice for enabling absolute versatility while shooting in a variety of environments.

IN-BODY ISO 💼 102400 Vari angle LCD Dual Card Slote

High Speed & High Performance

Digic X The EOS R3's powerful DIGIC X processing prowess and back-illuminated, stacked sensor provides high-speed data readout, allowing the camera to achieve up to 30 fps uninterrupted blackout-free burst shooting with the electronic shutter, which can reach a maximum shutter speed of up to 1/64000 seconds*. Shooting of swift action in well-lit environments with large aperture lenses is also easier.

* Tv / M mode only

Eye Control AF [EXCLUSIVE TO EOS R3]

Switch focus between subjects with

ease just by looking at the desired subject through the viewfinder with the EOS R3's Eye Control AF mode. The feature can be combined with other AF tracking modes for almost instantaneous tracking and acquiring of fast-moving scenes.

Top-Class Autofocus

The EOS R3's CMOS sensor, DIGIC X processor and Dual Pixel CMOS AF II offer autofocusing calculation and tracking of up to 60 fps while shooting continuously with the electronic shutter. Tracking accuracy is enhanced due to more calculations being performed for each captured image, allowing for easier shooting of fast-moving subjects that have sudden changes in direction and speed.

High Durability

features a lightweight magnesium alloy chassis that provides greater body

Ergonomics

The EOS R3's ergonomics is designed for greater accessibility to important functions during photography, containing two Smart Controllers for easy AF area control while also serving as AF-ON buttons. The two Multicontrollers provide for swift AF point selection, with vertical and horizontal grips offering a more secure and comfortable grip on the camera. Illuminated buttons also provide for greater visibility for camera operations even when shooting in dark conditions.

O Recommended for Sports & Wildlife

Long Battery Life

Enjoy shooting without any interruptions with the EOS R3's high-capacity LP-E19 battery. Up to 860 shots* can be captured on a single charge with the battery, making it ideal for extended sessions of photography in a variety of conditions, even when underwater.

[FULL FRAME] EOS R5

Quality for any creative pursuit. With fast shooting speeds, the EOS R5 captures stunning 8K resolution video alongside ultra high-quality stills with enhanced detail and clarity, delivering unparalleled versatility for a wide range of photography genres.

Ultra-High Resolution 45 MP

DiG!C Featuring a 35mm full-frame CMOS sensor, the EOS R5 captures images in incredible detail and clarity that look stunning even in low-light situations. With the new IBIS High Resolution Mode function, the EOS R5 can capture up to 400 MP images by merging nine separate images together, allowing it to output ultra high-resolution results.

In-Body Image Stabilizer

IN-BODY 🗸 OPTICAL

The EOS R5's 5-axis In-Body Image Stabilizer ensures stability for your images by helping to correct blur within your shots caused by the shaking of the camera, allowing you to shoot at slower shutter speeds while maintaining image clarity. Paired with the Optical Image Stabilizer within a compatible lens, it further provides greater stability equal to shooting with a shutter speed of up to 8 stops faster, allowing for greater low-light handheld, long exposure and supertelephoto shooting capabilities. Videos can also be recorded handheld or while on the move with enhanced clarity through the Movie Digital IS function offered by the camera's DIGIC X image processor.

8K Video

30p Experience a high-quality video recording experience with the EOS R5. The camera can record up to 8K video by capturing 8K RAW/DCI movies, which contain a pixel count of four more times when compared to a 4K DCI movie. Videos can also be recorded using IPB or ALL-I compression and saved as MP4 files, providing flexible integration with video clips recorded with other cameras.

The EOS R5 comes with two card slots that offer support for one CFexpress and one SD card, offering greater data storage capacity for photos as well as videos. Swift transfer speeds and a large camera buffer allow the camera to record 8K RAW films and images up to a burst speed of 20 fps with greater efficiency.

Fast Shooting Speed

CFExpress + SD Card

8K

Frames Capture important moments swiftly. The EOS R5 is able to continuously shoot up to 20 fps through its electronic shutter due to the high-speed data readout of the CMOS sensor and the DIGIC X's powerful processing capabilities.

commercial photography overall.

Professional Video Tools

Professional video tools built into the EOS R6 Mark II give you greater control in achieving the best possible shots. The False Colour function helps you to identify the exposure levels within your videos, offering an easy way to identify and correct underexposure and overexposure. Brightness levels that exceed preset levels are highlighted by the Zebra Display feature, allowing you to adjust any overexposure to prevent highlight clipping.

Impressive Details at 4K 60p & FHD 180p

The 6K oversampling process using the debayer algorithm in the CINEMA EOS System allows the EOS R6 Mark II to record stunning and clear 4K videos at 60p with reduced noise compared to native 4K recordings. FHD 180p recording capabilities allow you to record videos with a slow-motion effect, which can be slowed down up to 6x during playback at 30 fps.

In-Body Image Stabilisation

With three image-stabilising systems built into the camera, the EOS R6 Mark II allows you to record video while on the move with greater stability by reducing larae camera shakes or movements. The 5-axis In-Body Image Stabilizer also provides up to 8 stops of image stabilisation, allowing for handheld photography to be possible even in low-light environments.

Focus Breathing

The EOS R6 Mark II corrects the change in the field of view when the focal point is altered during video recording, helping to reduce focus breathing to provide a more seamless recording experience overall.

Powerful Low-Light Performance

102400 The low light sensitivity of up to EV -6.5 alongside an up to 102,400 ISO allows your camera to capture beautiful looking images even in poor lighting conditions or at night.

Easy live streaming. The EOS R6 Mark II can be used as a high-quality plug-andplay webcam without requiring any additional drivers or application thanks to USB Video Class/USB Audio Class (UVC/ UAC) support, providing an easy way to livestream with exceptional video quality.

6K ProRes Raw

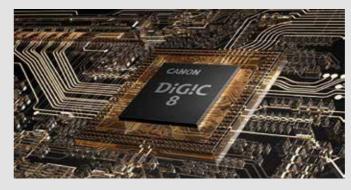

The EOS R6 Mark II can output 6K ProRes Raw video through the HDMI port to the ATOMOS Ninja V+ External Recorder, providing stunning quality and video recording capabilities for professional workflows.

Fast Autofocus & 40 fps Burst Shooting

Capture subjects with speeds as fast as 0.03 seconds using the EOS R6 Mark II's powerful autofocusing capabilities, which can shoot continuously up to 40 fps in electronic shutter mode while utilising AF/AE tracking. The 40 fps burst can also be used silently for situations that demand for minimal noise.

30.3 MEGA

With the full-frame CMOS sensor, the EOS R delivers up to 30.3 effective megapixels for stunning outputs with complete detail and clarity, while its DIGIC 8 image processor expands its ISO range for enhanced camera performance.

Multi-Function Bar

The EOS R's Multi-Function Bar provides swift accessibility to important camera functions and settings, offering greater convenience while you shoot.

4K Video

The EOS R is able to capture 4K video recordings as well as record in Canon Log, which has a wide colour gamut alongside richer gradations and offers greater control for post-processing and post-production. The camera can also be connected to external devices to display 4K video through an HDMI terminal

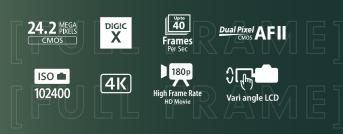

Magnesium Alloy

Built with a magnesium alloy chassis, the EOS R is lightweight and durable against heat and electromagnetic radiation.

[FULL FRAME] EOS R8

Weighing in at 461g, the EOS R8 is perfect for content creators who are always on the move thanks to its lightweight frame, video and autofocus capabilities that help to provide greater flexibility for content creation.

[FULL FRAME - EOS R8]

[FULL FRAME] EOS RP

One of the earliest debutants to the EOS R family, the EOS RP packs powerful camera functions as well as features within a compact frame, allowing it to deliver superior camera performance while being conveniently portable for any creative pursuit.

Professional Video Tools

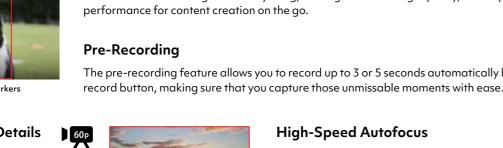

The EOS R8's built-in video tools help to ensure brilliant results for your videos. The False Colour function allows you to easily determine the exposure within your videos, offering an easy way to correct overexposure or underexposure. Highlight clippings due to overexposure can be prevented thanks to the Zebra Display function, which displays patterns on areas where brightness exceeds a preset level while recording. Social media content creation is also made simple thanks to aspect markers, which provide real-time guide markers according to your desired aspect ratio for ideal framing.

Lightweight

The Canon EOS R8 weighs in at only 461g, making it ideal for high quality, future-proof quality and performance for content creation on the go.

Pre-Recording

Aspect Markers

Impressive Details at 4K 60p

With the 6K oversampling processing that uses the debayer algorithm found in the CINEMA EOS System, exceptional 4K quality videos at 60p with enhanced video quality and noise reduction can be recorded with ease.

FHD 180p

Enjoy cinematic High Frame Rate slow-motion effects on your videos with the EOS R8's FHD 180p recording capabilities. Videos recorded can be slowed down up to 6x when being played back at 30 fps.

FHD

High-Speed Autofocus

The EOS R8 shoots up to 40 fps in electronic shutter mode with AF/AE tracking enabled, alongside an autofocus speed as fast as 0.03 seconds that allows for dynamic and fast scenes to be captured effortlessly. The 40 fps silent burst also allows for fast photography in situations where silence is necessary.

UVC/UAC for Livestreaming

The EOS R8 can operate as a webcam simply by using a USB cable thanks to its USB Video Class (UVC) and USB Audio Class (UAC) support, giving you enhanced video quality for live streaming purposes.

Small & Light Full-Frame Mirrorless

purposes.

Powerful Autofocusing

Capture swift and sudden moments with ease. The EOS RP is able to focus swiftly in just 0.05 seconds while possessing up to 4,779 selectable AF positions for enhanced precision and flexibility in framing your photos.

Focus Bracketing

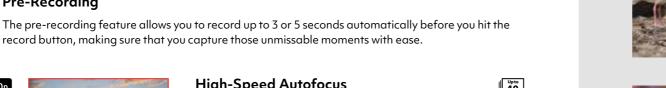

you capture subjects that have a shallow depth of field while keeping the entire subject in focus. Without the need for complex and time-consuming manual focus stacking, the Focus Bracketing feature simplifies the entire process by automating it. Simply select a specific number of images (2 to 999) to be taken after selecting the nearest focal point. Canon's Digital Photo Professional software can then be used to compile them together for image results with impressive corner-to-corner clarity.

Touchscreen LCD & Beginner-Friendly

The EOS RP can be easily used by beginners, coming with a 3.0-inch Vari-angle Touchscreen LCD that helps you to capture images from high or low angles with minimal effort. Additional easy-to-use features like Timelapse Movie mode for easy timelapse photography capture, Eye Detection AF for quick focus tracking of moving portrait subjects and Scene modes for optimal scene capture also assist in letting beginners capture quality stills and video without requiring much expertise.

[FULL FRAME - EOS RP] Canon EOS O Recommended for Travel

The EOS RP's lightweight and compact nature makes it a portable full-frame mirrorless camera, perfect for carrying around for a wide range of photography

Perfect for professional product photography, Focus Bracketing lets

0.05s Fast AF Speed

Featuring a smaller APS-C CMOS sensor, the APS-C range of mirrorless R system cameras is typically more lightweight, compact and travel-friendly than their full-frame counterparts. An inherent characteristic of a smaller sensor is a 1.6x crop factor, which gives you a telephoto effect that makes faraway subjects appear 1.6x larger in the frame. With less need for manual cropping in post-editing, closeups of distant subjects can be captured in all their fine details in high resolution while retaining a high megapixel count, which makes APS-C cameras ideal for wildlife, bird and sports photography.

APS-C R system cameras work best with RF-S lenses. These lenses are specially designed for the smaller sensor and are similarly compact and lighter in design and weight. At the same time, APS-C R system cameras share the same RF mount as the full-frame series, so they remain fully compatible with the entire range of RF lenses besides RF-S lenses.

is made possible with the EOS R7's built-in APS-C, offering a 1.6x telephoto effect while maintaining quality, perfect for capturing faraway subjects such as wildlife, birds and other animals with absolute ease and clarity.

Uncropped 4K UHD Fine video processed from 7K RGB data can be captured with the EOS R7, offering greater image guality with minimal colour distortion and noise. It also supports Canon Log 3, providing accurate highlights and a wider dynamic range.

In-Body Image Stabilisation

Shoot the outdoors in absolute clarity with the camera's In-Body Image Stabilizer, which provides an image stabilisation of up to 8 stops when used alongside a compatible RF lens with optical IS. Movie Digital IS can also be used alongside during video recording, offering up to 3 types of image stabilisation for smoother results while shooting handheld, making it ideal for vlogging. Images and video can also be adjusted to be more accurately horizontal with the Auto Levelling Function, which makes use of the in-body image stabilisation's roll correction to provide more efficient results.

30 fps RAW Burst & Pre-Shooting

Panorama Shot

Capture wide shots of cities and landscapes using the Panorama Shot feature. Up to 200 shots can be captured simultaneously, before they are merged to create a beautiful panoramic shot.

Focus Bracketina

Capture subjects with a shallow depth of field while keeping them entirely in focus easily using the camera's Focus Bracketing feature, which lets users select a specific number of images ranging from 2 to 999 shots for the capture of different focus points within a scene. Shots captured are automatically stacked together within the camera afterwards without the need for any additional software, offering brilliant results.

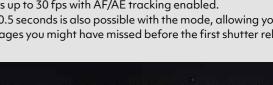

1200mm · f/8.0 · 1/500 sec · ISO 100

Excellent For Video

Easily capture dynamic scenes, subjects and moments with the EOS R7's RAW Burst, which goes up to 30 fps with AF/AE tracking enabled.

Pre-shooting of up to 0.5 seconds is also possible with the mode, allowing you to capture additional images you might have missed before the first shutter release.

Panning Mode

Create panning shots with greater ease using EOS R7's panning mode, which utilises subject detection data to provide clearer panning shots. It uses the image stabilisation system within the camera when subject blur is detected to ensure greater focus on your subject while keeping the background flowing smooth.

30 Frames

O Recommended for Travel & Vlogging

Easy To Use

The EOS R10 offers a variety of convenient features that make it a breeze to use for smartphone users as well as casual camera users. Up to 4K UHD 30p video with 6K oversampling can be recorded with ease, offering excellent quality for your vlogs. Live video can be streamed* from the camera onto YouTube by using the image.canon cloud service. Touchscreen controls, a simple guided interface paired with convenient USB-C charging and wireless file transfers also provide for an effortless experience with the camera overall.

* Streaming to YouTube with the camera has the same requirements as live streaming from a mobile device onto the atform. Only scheduled live streams are supported

Well-Rounded Specs

Digic X The EOS R10 is perfect for general and versatile shooting, with its powerful DIGIC X image processor as well as high continuous shooting speeds up to 23 fps with the electronic shutter and up to 30 fps RAW burst mode, allowing for the capture of dynamic scenes with ease.

Small & Light Camera

At just 429g, the EOS R10's compact frame and lightweight design makes it ideal for travel and everyday usage.

Focus Bracketing

The EOS R10 lets you capture subjects with a shallow depth of field while keeping it in focus using the Focus Bracketing feature, which allows users to select a specific number of images ranging from 2 to 999 shots to capture different focus points within a scene. Shots taken are stacked together automatically, allowing the camera to output images with stunning sharpness and a deep depth of field.

[APS-C] **EOS R50**

The RF-mount successor to the popular EOS M50 Mark II, the EOS R50 boasts impressive video recording and image capturing capabilities alongside being compact, making it ideal for high-quality vlogging or content creation purposes.

4K (cropped) - EOS M50 Mark II

Movie for Close-up Demo

Give audiences a clearer and closer look at products, food and other items you showcase in your hands without worrying about them being out of focus while you vlog with the EOS R50's Movie for Close-up Demo feature. It automatically focuses on the item closest to the screen, before switching it back to you when the item is pulled off screen, allowing you to always stay in focus as you record content without any hassle.

6K Oversampling

Utilising the same debayer algorithm from the CINEMA EOS System, the EOS R50 captures 4K 30p video with 6K oversampling, providing greater clarity and reduced noise compared to native 4K recordings.

Streaming Ready

4K (uncropped) - EOS R50

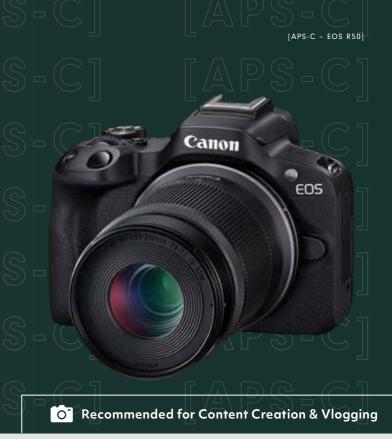

The EOS R50 can be used for high-quality live streaming and webcam purposes through a simple plug-and-play operation by connecting it to your computer using a compatible USB-C cable.

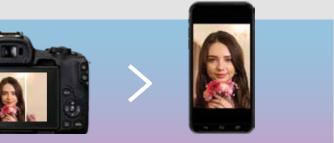

Aspect Markers

Framing for your content creation is effortless with aspect markers, which help to provide real-time guide markers of specific and commonly used aspect ratios suited for video on popular social media networks or other online platforms.

Native Vertical Recording

Vertically recorded videos on the EOS R50 can be viewed on smart devices immediately in the same orientation without any editing needed, giving you an effortless way to upload them to your favourite social media platforms.

Dual Pixel CMOS AF

The Dual Pixel CMOS AF comes with up to 143 selectable AF zones, alongside Eye and Face Detection AF that provides for wider and swifter AF area coverage.

Pop-up Flash

Dual Pixel AF

Well-lit shots are made possible even in scenes with poor lighting thanks to the EOS R100's built-in flash, which can also be used while shooting against a backlit scene as a fill-in light.

Hybrid Auto

À Create highlights of your day with ease using the Hybrid Auto Hybrid Auto mode, which automatically records

2 to 4 seconds of footage before an image is taken with the camera. Captured stills and video from the same day are compiled into a digest movie afterwards, providing you a way to create videos just by taking images.

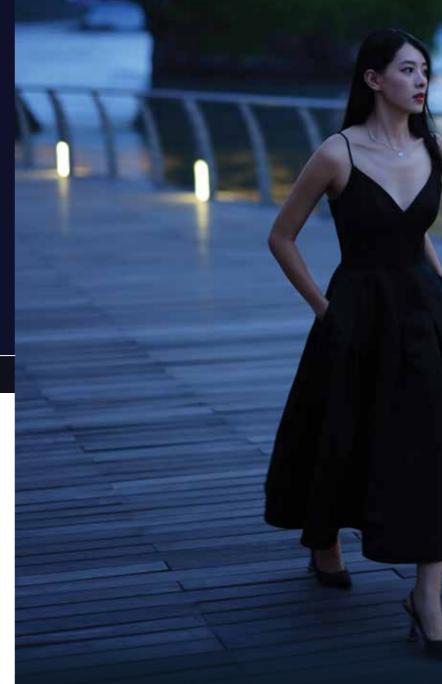

6.5 Frames Per Sec

Silent Mode

6.5 fps Shooting Speed & Silent Shutter

Capture fast-moving scenes with the camera's shooting speed of up to 6.5 frames per second*. For situations where noise should be minimal, the silent shutter mode allows for quiet photo taking.

Cinema

The introduction of the RF Mount into the Cinema EOS System lineup helps filmmakers and photographers achieve new creative heights by providing compatibility with RF lenses, which offer excellent image quality alongside intuitive features that help to output brilliant results. Movies can be shot with greater clarity thanks to improved image stabilisation and superior autofocusing technologies. Less distracting changes in brightness levels when adjusting the aperture during video recording is also made possible due to the lenses supporting smaller increments of 1/8 stop.

EOS R5C · RF50mm f/1.2L USM · 50mm · f/1.2 · 1/80 sec · ISO 160

Native RF Mount

The EOS C70's native RF Mount enables greater versatility with RF lenses thanks to its 20mm flange distance, and the 54mm diameter also helps to reduce light ray bending and refractions within the camera lens for greater performance overall. The mount also offers faster communication speeds between the camera and lens that enhance image stabilisation as well as autofocusing capabilities for greater photographic performance.

8K Video

Through its full-frame 8K 60p RAW internal recording capabilities, the 60P EOS R5 C is able to capture stunning detail and quality effortlessly while providing more flexibility with post-production through 4K 4:2:2 10-bit recording with 8K readout oversampling. The high 4K 120 fps frame rate also allows for slow motion scenes to be recorded without the need for a separate audio input, thanks to on-board support for simultaneous audio recording.

45 MP Image Quality

The EOS R5 C's 45 megapixels provides stunning image results throughout the width of its full-frame sensor, while providing for burst capabilities of up to 20 fps that can be paired with intuitive autofocus technologies like the Dual Pixel CMOS AF II (Photo mode) and EOS iTR AF X. An ISO sensitivity of 51,200 and a brightness range of EV-6 also assists in greater performance in low-light situations.

Superior Autofocusing

With multiple powerful AF technologies powered by deep learning technology like Dual Pixel CMOS AF and Eye Detection AF, tracking subjects is made effortless with the EOS R5 C. AF modes like Dual Pixel Focus Guide offer enhanced versatility while shooting, and the vari-angle touch screen LCD allows for direct control over autofocusing through your own hands.

Internal Cooling Fan

Shoot 8K/60p videos without overheating or interruption with the built-in cooling fan that keeps your camera's internals low in temperature.

Extensive Recording Format with Professional Monitoring Tools

Capture an extended dynamic range with Canon Log 3, PQ and HLG recording, while utilising professional tools such as Waveform Monitor and False Colour.

45.0 MEGA

Enhanced Workflow

Enjoy smoother workflows that offer swift image and video transfers, smart device connectivity and applications designed to make the sharing of data effortless using EOS R System cameras.

Ethernet Port

CR3

Save on storage space and time through the EOS R System cameras' Compact Raw or C-RAW (.CR3) file format capture capabilities. C-RAW files are smaller than RAW files and come with convenient benefits like in camera processing capabilities, compatibility with Digital Lens Optimizer as well as other additional benefits.

An industry-standard USB-C port is featured on select EOS R System cameras, providing an easy way to have a wired connection from the camera to an iOS/ Android smartphone for swift transfers of JPEG/MP4 files. This method of transfer

is much faster than a standard Wi-Fi transfer, allowing it to be useful in situations

USB-C Connectivity

where time is limited.

cameras' built-in Wi-Fi and

The image.canon cloud storage service stores original images and videos uploaded to it, alongside offering additional optional storage for users who require more space for their creations. It is also designed to automatically forward images in their original format from the camera to a multitude of devices like computers, iOS and Android mobile devices and compatible third-party services - giving photographers an effortless and seamless way to share their creations with others and on platforms like

Google Drive, YouTube and Flickr.

Mobile File Transfer [EOS R3, EOS R5, EOS R5C & EOS R6 MARK II ONLY]

Select Canon EOS R System cameras allow for image transfers from the camera to an iOS/Android smartphone through a wireless (Wi-Fi) or wired (USB-C) connection thanks to the Mobile File Transfer (MFT) application. Files transferred are sent to a remote server through the smartphone's 5G network. The feature can be customised to fit your workflow through three modes (Auto Transfer, Selective Transfer or Filter Transfer), and IPTC metadata can be edited or removed on selected images.

With the EOS R cameras' built-in Wi-Fi, you can transfer data effortlessly with swift speeds. Remote shooting is made easy and

wireless file transfer to mobile devices alongside tablets is effortless through Canon's Camera Connect application and Digital Photo Professional Express. Wi-Fi Protected Access (WPA3) is supported on selected models, providing a layer of protection for potential corruption while files are being transferred. Bluetooth Low Energy (BLE) also provides a method to pair devices with lower power consumption.

[ENHANCED WORKFLOW]

Built-in Ethernet Port [EXCLUSIVE TO EOS R3]

The EOS R3 features a built-in Ethernet port that gives it the capabilities for swift, wired LAN file transfers. FTP, FTPS, SFTP and authentication LAN are supported by the 1000BASE-T wired LAN, allowing for safer transfers of high-resolution RAW or video files with greater stability. The EOS R3 also comes with authenticated LAN (IEEE 802.1X), providing security that matches international security standards required by professional organisations and events.

DPP Express

G_M Enjoy processing and adjusting JPEGs and CR3 RAW files swiftly on the go on compatible iOS devices with Canon's Digital Photo Professional Express application, which can be paired with Canon's Camera Connect application to streamline processing workflows even further.

RFLENSES

Amazing Performance

Superior Image Quality & UD Lens

With a larger mount diameter paired with a short back focus, the RF lenses are able to deliver high image quality through their designs, providing enhanced corner-to-corner image quality overall. Flaring and ghosting is also reduced thanks to special coatings like Subwavelength Structure Coating (SWC) and Air Sphere Coating (ASC) being applied to the lens. Canon also utilises UD (ultra-low dispersion) glass and Super-UD glasses within certain RF lenses to correct chromatic aberrations.

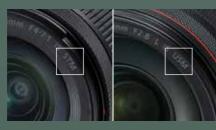

Control Ring

A control ring is equipped on the lens barrel of all RF lenses. It provides a quick way to adjust settings such as aperture, shutter speed, exposure compensation and other additional features on the camera by simply turning the ring. The clicking mechanism and tactile surface of the dedicated control ring allow it to be used with ease and confidence, so settings can be adjusted while your eye is still on the viewfinder. Select RF lenses have dual-purpose control rings that are combined with a manual focus ring.

Optical Image Stabilisation

The Optical Image Stabilisation technology found inside select RF lenses is specially designed to be used with EOS R System cameras, offering enhanced stabilisation for images that allow for an easier time with low-light photography alongside the use of slow shutter speeds without the need for a tripod.

STM & USM

RF lenses possess either a compact Ultra Sonic Motor (USM) or a Stepper Motor (STM) that both help to facilitate smooth autofocusing performance with minimal noise while recording movies. A single or dual Nano USM is present in selected lenses for high-speed, high precision autofocus.

Lens Information Display

Easily check lens information and settings without losing sight of your subject simply by looking into the viewfinder with the EOS R System cameras.

Ultra-Wide Angle & Wide Angle

RF16mm f/2.8 STM

An engineering marvel, the RF16mm f/2.8 STM ultra-wide angle lens is only 4cm in length while featuring a large aperture at a price point that is very attractive for any photographer. The lens is designed ingeniously to retain performance in a very compact form factor, making it perfect for vlogging, underwater photography and astrophotography. This lens also achieves 0.26x magnification with a 0.13m minimum focusing distance for unique wide-angle close-ups with bokeh.

Ultra-Wide Angle Zoom

RF-S10-18mm f/4.5-6.3 IS STM

The first ultra-wide angle zoom lens in the RF-S series, the RF-S10-18mm f/4.5-6.3 IS STM offers excellent image quality alongside enabling wide-angle capabilities or APS-C camera users for travel, vlogging and everyday snaps. Lightweight and compact, the lens also comes with image stabilisation that reduces blurring caused by movement while shooting, alongside a powerful autofocus for movies, making it perfect for shooting video or photos on the move in areater clarity.

RF14-35mm f/4L IS USM

The ultra-wide RF14-35mm f/4L IS USM is a versatile zoom lens with a constant aperture of f/4, advanced optical design and 0.38x magnification. Designed to be sleek and compact, this lens offers portability for handheld shooting. The broader field of view at 14mm makes it a preferred choice for landscape, nature, and architectural photography.

The first non-L lens of its kind, the RF15-30mm f/4.5-6.3 IS STM promises versatility of a wide-angle zoom lens and the excellent image quality of the RF mount at a wallet-friendly price. Versatility is the greatest advantage of this lens. The 15mm focal length captures a larger area of grand landscapes with a dynamic perspective. At the other end, the 30mm length allows an angle of view that is optimised for street and everyday photography.

Standard

RF50mm f/1.2L USM

The RF50mm f/1.2L USM lens delivers gorgeous images, especially portraits for professional photographers. With 10 aperture blades and offering the widest aperture available in the RF line-up, its f/1.2 aperture means amazing performance in low light and beautiful detailed images with evocative background blur.

RF28mm f/2.8 STM

Only 120g in weight, the RF28mm f/2.8 STM is the perfect lightweight pancake lens for excellent low-light capture and stunning bokeh. Having a retracted length of less than 2.5 centimetres, its thin design and portability makes it ideal for vlogging and photography purposes on the go. Enjoy seamless video recording with focus breathing correction and smooth, quiet autofocus.

RF10-20mm f/4L IS STM

Being Canon's widest lens*, the RF10-20mm f/4L IS STM offers an ultra-wide focal length of 10mm for easier capture of wider areas for your photos and videos. Its small and lightweight design makes it highly portable and ideal even for aerial drone usage. The lens comes with 5 shutter speed stops of image stabilisation that goes up to 6 stops when used with a compatible camera for greater low-light capabilities. A lead screw-type STM allows for quick and quiet autofocusing and smooth focus tracking when recording videos.

* Among all interchangeable lenses for cameras compatible with 35mm full-frame sensor (excluding fish-eye lenses). As of 10th October 2023 (researched by Canon)

RF15-30mm f/4.5-6.3 IS STM

RF15-35mm f/2.8L IS USM

The RF15-35mm f/2.8L IS USM is a bright ultra-wide zoom lens with a constant f/2.8 maximum aperture at any focal length perfect for shooting portraits and wedding. Ingenious optical design allows for high corner-to-corner resolution while offering up to 5 stops of image stabilisation for shooting handheld in low-light situations.

RF50mm f/1.8 STM

The RF50mm f/1.8 STM is a high-quality yet affordable fixed focal length lens with a large aperture of f/1.8 that delivers amazingly soft bokeh. Weighing only approx. 160g, the lens design is compact and lightweight, making it highly portable and versatile. With a minimum focusing distance of 30cm, the RF50mm f/1.8 STM is perfect for food, snapshots and portrait photography.

Medium-Telephoto

RF85mm f/1.2L USM

The RF85mm f/1.2L USM is an ultra-fast prime lens that is great for low-light situations. It features an impressive 9-blade circular aperture with a maximum aperture of f/1.2, producing superb bokeh for stunning portraiture.

RF85mm f/1.2L USM DS

The RF85mm f/1.2L USM DS delivers the highest optical performance at maximum aperture among Canon interchangeable 85mm lenses. The Defocus Smoothing (DS) function ensures extremely smooth rendering of out-of-focus regions, producing soft and natural bokeh with delightful highlights and even fall-offs.

RF135mm f/1.8L IS USM

Achieve perfect bokeh and stunning portraits with the RF135mm f/1.8L IS USM, which offers a large aperture of f/1.8 that allows for impressive background separation as well as a 0.26x magnification. When paired with a compatible camera, up to 8 stops of image stabilisation can be achieved for sharper images in low-light situations. Two customisable lens function buttons and high-speed autofocus powered by Nano USM allow for swift and expert manoeuvres with ease.

Telephoto Zoom

RF-S18-150mm f/3.5-6.3 IS STM

Reach further and get closer with one lens. The RF-S 18-150mm f/3.5-6.3 IS STM is a light and compact EOS R-series APS-C zoom offering up to 4.5-stop optical Image Stabilizer plus a powerful 18-150mm range for stunning images, near or far.

RF24-240mm f/4-6.3 IS USM

Offering versatility in a single lens, the RF24-240mm f/4-6.3 IS USM has a 10x optical zoom in a compact body while providing excellent image stabilisation of up to 5 stops, making it superb for travel and outdoor usage. Driven by the tiny Nano USM, the RF24-240mm f/4-6.3 IS USM achieves superb speed when focusing while maintaining quiet and smooth transition, even for videos.

Standard Zoom

RF-S18-45mm f/4.5-6.3 IS STM

Start your EOS R APS-C mirrorless journey with a lens that covers all your photo and video needs. The RF-S18-45mm f/4.5-6.3 IS STM is light and compact, offering a 4-stop optical Image Stabilizer plus a useful 18-45mm zoom range for great results every day

RF24-50mm f/4.5-6.3 IS STM

With a 24-50mm zoom range and an image stabilisation of up to 7 stops when used with a compatible camera, the RF24-50mm f/4.5-6.3 IS STM is a lightweight lens that only weighs 210g and offers stunning results for both photography and video. A versatile focal length suitable for vlogs, daily snapshots and closeup portraits, along with its portable design, make this ideal as a starter lens for those new to the EOS R System.

RF24-70mm f/2.8L IS USM

Part of the highly sought-after RF f/2.8 zoom trinity series, the RF24-70mm f/2.8L IS USM offers impeccable image quality in a durable body. With a bright f/2.8 aperture at any focal length in its zoom range, its strong low-light capability together with up to 5 stops of image stabilisation, this lens is perfect for a wide range of photography genres.

RF24-105mm f/2.8L IS USM Z

The RF24-105mm f/2.8L IS USM Z's wide focal length range of 24-105mm and an aperture of f/2.8 allows it to provide excellent image quality and versatility for portraits, sports and video productions. It is also designed with two Nano USM units for swift autofocus while providing an effective image stabilisation of up to 5.5 stops. Equipped with an iris ring, the first among RF lenses, flexible aperture control is possible while its control ring supports the assignments of various functions. The RF24-105mm f/2.8L IS USMZ is also compatible with the Power Zoom Adapter PZ-E2, which can be detached or attached to the camera effortlessly, allowing for precise and smooth zooming while shooting.

RF24-105mm f/4-7.1 IS STM

Designed not only to be light and compact, the RF24-105mm f/4-7.1 IS STM is also a very versatile lens that has macro function and would not weigh you down as you shoot. The STM motor also provides impressively quiet and smooth autofocus performance, making this lens ideal for videography, travel and much more.

RF24-105mm f/4L IS USM

The RF24-105mm f/4L IS USM is versatile with its broad zoom range and constant f/4 maximum aperture, making it ideal for landscapes, portraits and much more. This is also the first L series lens to feature Canon's Nano USM for compact design and fast and quiet AF in movie shooting.

RF28-70mm f/2L USM

The RF28–70mm f/2L USM features a maximum aperture of f/2, offering unparalleled performance throughout its zoom range. With L series optics, it offers the flexibility and performance of a handful of fixed focal length lenses, delivering superlative performance from 28–70mm.

RF70-200mm f/2.8L IS USM

A remarkably fast telephoto zoom lens, the RF70-200mm f/2.8L IS USM brings consistently high image quality across its entire focal length with its large f/2.8 aperture. A rugged built and compact design makes the RF70-200mm f/2.8L IS USM ideal for sports, portraits, wedding and wildlife photography

RF70-200mm f/4L IS USM

Possibly the shortest and lightest telephoto zoom lens ever made, the RF70-200mm f/4L IS USM measures less than 12cm and weighs only approx. 695g, making its size similar to a standard zoom lens. However, this lens packs a high resolving power to deliver stunning quality across the entire focal range. The lens's image stabilisation of up to 5 stops offers stability even when shooting dark scenes. With the iconic heat-shielding white paint and dust & water-resistant construction, this lens is perfect for outdoor photography.

RF100-400mm f/5.6-8 IS USM

The RF100-400mm f/5.6-8 IS USM is lightweight, with a native 5.5-stop image stabilisation that can be further expanded to 6 stops when paired with a camera that is equipped with In-Body IS. Weighing a mere 635g, it is approx. 60% lighter than the EF100-400mm f/4.5-5.6L IS II USM. In addition, this lens works perfectly with both the Extender RF 1.4x and RF 2x.

RF100-500mm f/4.5-7.1L IS USM

The first super-telephoto zoom lens for the RF mount, the RF100-500mm f/4.5-7.1L IS USM is one of the most versatile RF optics for sports and wildlife photography. The lens's IS can dramatically reduce camera shake up to 5 stops. Autofocusing is provided by two focus groups driven by their own Nano USM motor for fast, precise and silent performance.

RF-S55-210mm f/5-7.1 IS STM

This compact and portable telephoto zoom lens only weighs 270g, making it ideal as a secondary zoom lens, especially for APS-C users. A versatile zoom range gives you greater reach for faraway subjects, while a maximum magnification of 0.28x at the 210mm end lets you get closer to nearby subjects at the same time. The Optical Image Stabilizer achieves up to 4.5 shutter speed stops of image stabilisation, or up to 7 stops with Coordinated Control IS when paired with IS-equipped cameras, giving you steadier and sharper shots even when using handheld.

RF100-300mm f/2.8L IS USM

With a constant large aperture of f/2.8 that offers stunning bokeh and opens new possibilities in capturing high-speed action in low-light conditions, the RF100-300mm f/2.8L IS USM delivers superior image quality and reach at the top of its class. With up to 6 shutter stops of image stabilisation (when used with a compatible camera), the flexibility of 3 IS mode options, along with excellent autofocus control powered by dual Nano USMs, sharp images of moving subjects can be captured even when using handheld or in difficult lighting conditions. The lens can also be used with the Extender RF 1.4x and RF 2x.

RF200-800mm f/6.3-9 IS USM

The RF200-800mm f/6.3-9 IS USM is the world's first* super-telephoto zoom lens, having a telephoto end of 800mm ideal for handheld telephoto shooting of faraway subjects not limited to wildlife and various genres of sports. With 200-800mm zoom capabilities, it enables high-quality captures of long shots as well as close-up shots without the need to switch out lenses. Additionally, its in-lens IS provides an image stabilisation that is as effective as a 5.5 shutter stops alongside its weight of approximately only 2,050g makes the lens optimal for shooting outdoors due its portability and superior performance.

* As an AF interchangeable lens for full-frame sensor mirrorless cameras that have already been released as o November 1, 2023. (Based on Canon's internal survey.)

RF5.2mm f/2.8L Dual Fisheye

Canon's first ever dual fisheye lens, the new RF5.2mm f/2.8L produces a parallax effect that can be used to create 3D 180-degree Virtual Reality (VR) images. When attached to the EOS R5 and EOS R6 Mark II mirrorless cameras, the lens enables users to harness the camera's recording capabilities to produce ultra-high-definition video with an immersive feel. As special lens coatings are used, shooting in backlit conditions becomes a breeze.

Super-Telephoto

RF400mm f/2.8L IS USM

Built for RF mount cameras, the RF400mm f/2.8L IS USM super-telephoto lens is a fantastic low-light performer with its quick f/2.8 aperture and optical IS. Take on wildlife and sports photography with advanced AF that ensures sharp focus clarity with accurate tracking on fast moving subjects, delivering incredible image quality.

RF800mm f/5.6L IS USM

Crafted for those who desire a professional quality ultra telephoto lens, the RF800mm f/5.6L IS USM is perfect for photographing subjects from a distance like wildlife and sports. Capable of up to 4.5 shutter speed stops of image stabilisation for that tack sharp image while weighing only approximately 3,140g.

RF600mm f/4L IS USM

As a top performer, the RF600mm f/4L IS USM is a super-telephoto lens that delivers stunning image quality for sports and wildlife photography With up to 5.5 stops of image stabilisation and ultra-fast focusing, get clean and crisp images while nailing critical moments. Coated in heat-resistant white paint and with L-series robust build to withstand rigorous professional use, this lens allows you to shoot confidently outdoors.

RF800mm f/11 IS STM

Crafted for portrait lovers, the

RF85mm f/2 Macro IS STM

provides stunning bokeh for

Optical Image Stabilizer.

to quickly close in for

detailed shots.

this portrait lens has a 0.5x

beautiful background separation

Combined with macro capabilities,

magnification ratio and can focus

as near as 35cm from the subject,

making it handy for portrait and

wedding photographers who want

even in low light with its built-in

The RF800mm f/11 IS STM, one of the lightest super telephoto lenses, comes with up to 4 stops of image stabilisation to significantly reduce camera shake. Apart from the phenomenal reach, the lens is much smaller and lighter than competing lenses for DSLRs. The incredible portability and focal length opens up new doors in wildlife photography and videography.

RF600mm f/11 IS STM

Shooting close-ups of sports, birds, wildlife, and other faraway things is what the RF600mm f/11 IS STM does best. Weighing less than 1kg, with a compact, retractable design, it is easy to carry around and handle. With high-performance IS of up to 5 stops, image sharpness gets a huge boost even in handheld shooting. Pair the lens with Extender RF 1.4x or Extender RF 2x to extend the reach up to 1200mm!

RF1200mm f/8L IS USM

Weighing only at approximately 3,340g, the RF1200mm f/8L IS USM has revolutionised what a lens of this focal length could be. It is smaller and much lighter than its EF equivalent. Moreover, this lens is packed with features like image stabilisation of up to 4 shutter stops for that impeccable image quality that a professional would expect.

Macro

Lightweight and compact, the new RF24mm f/1.8 Macro IS STM is a fantastic prime lens for daily usage across a variety of subjects. With a large maximum aperture of f/1.8, the wide-angle prime lens provides a very shallow depth of field, allowing to 5-stop image stabilisation for close-up or portrait compositions to excellent handheld and low-light achieve intense and creamy bokeh. macro photography The lens is great for shooting videos too with its wide field of view and is easy to use for self-filming as it does not require a huge working distance. With up to 0.5x magnification, stunning close-ups can also be captured with ease.

Compact, lightweight and easy to carry, the RF35mm f/1.8 Macro IS STM lens offers amazing versatility in a wide-angle macro lens. It has a 0.5x magnification ratio and a close focusing distance of 17cm with up

RF24mm f/1.8 Macro IS STM RF35mm f/1.8 Macro IS STM RF85mm f/2 Macro IS STM RF100mm f/2.8L Macro IS USM

The RF100mm f/2.8L Macro IS USM is in a league of its own. As the world's first medium telephoto macro lens with maximum shooting magnification of 1.4x, it features a Spherical Aberration control ring to adjust bokeh to enhance the photograph with a flattering soft focus effect, making it an ideal lens for portraiture. Integrated Dual Nano USM motors achieve smooth and accurate AF with minimal operational noise. The lens is designed to suppress focus breathing, delivering consistency across video and stills

[CINEMA EOS SYSTEM]

RF Cinema Lenses

Canon's first series of RF-mount-compatible Cinema Lenses are designed to deliver ideal optical performance for professional video productions. Impressive 4K and 8K video recording capabilities, transmission functionality found with the RF mount, convenient features and cinemastyle operability help to elevate efficiency for shooting movies, television as well as commercials.

RF Mount

Direct Attachment

The lenses do not require a mount adapter when used with the EOS C70 and EOS R5C, offering you greater convenience when switching lenses.

Faster Communication for Expanded Functionality

The RF mount allows for faster communication between the camera and lens, allowing for more advanced and expanded functionality, such as:

Distortion Correction

Distortion correction on compatible cameras while shooting video is enabled thanks to swift data transfer speeds that instantly communicate lens metadata to the camera.

Lens Metadata

Useful lens information is displayed on the camera viewfinder, while metadata information BACK FOCUS such as the name of the lens being used and positions can be stored within images.

CN-R50mm T1.3 L F CN-R135mm T2.2 L F CN-R85mm T1.3 L F

Peripheral Illumination

Through registered lens information, peripheral illumination correction can be activated or deactivated at will.

Dual Pixel Focus Guide

The Dual Pixel Focus Guide feature can be used during manual focus, which utilises lens distance and distance measurement information to display front and back focus at the same time, giving users a way to swiftly and precisely focus with their camera.

Outstanding **Optical** Performance

Full Frame Compatible

The RF-mount-compatible Cinema Lenses are compatible with full-frame image sensors for greater versatility.

Accurate & Consistent Colour Balance

Enjoy warm and natural colour reproduction, especially for skin tones.

8K, 4K & HDR Compatible

Enjoy enhanced optical performance and compatibility with 8K, 4K and HDR capable cameras.

Cinematic Image Quality

Bright T-Numbers

With their bright apertures, the lenses have outstanding low-light capabilities and are able to capture stunning and shallow depth-of-field shots.

Reduced Focus Breathing

Focus breathing is minimised when using the lenses, helping the field of view remain the same even when the focus is changed.

11-Blade Iris

Bokeh is richer and smoother while capturing movies thanks to the 11-blade iris found within the lenses.

RF Lens Accessories

To incorporate your EOS R System into a larger EOS system, three adapters enable unfettered operation of EF and EF-S lenses as well as extension tubes with no loss of light. RF extenders can be used with selected RF lenses to get larger close-ups with the original camera resolution.

Extender RF 1.4x

Extends a super telephoto lens's focal length by 1.4x. For example, an 800mm focal length can become 1120mm.

Mount Adapter EF-EOS R

Lightweight and compact, this adapter connects EF and EF-S lenses to the EOS R System cameras, exponentially expanding the list of compatible lenses.

Drop-In Filter Mount Adapter EF-EOS R

This mount adapter enables compatibility with EF and EF-S lenses and includes drop-in filter capability for use with circular polarising filters or variable ND filters. This enhancement enables compatibility with numerous lenses regardless of their front diameter, and makes filter use possible with lenses such as the ultra-wide EF 11–24mm f/4L USM lens or the tilt-shift TS-E 17mm f/4L lens which cannot accept a filter on the front.

Mount Adapter EF-EOS R 0.71x

The Mount Adapter EF-EOS R 0.71x opens up more creative possibilities for your EOS C70 by providing compatibility between the camera and EF Mount lenses, with its internal optics allowing for a 1-stop gain in light transmission. This enables lenses to be used without a crop factor, allowing adapted lenses to have an extremely close field of view that corresponds to their focal length. With full electronic compatibility between the RF Mount on the EOS C70 and EF lenses, all forms of metadata are able to easily pass through for seamless usage with ease. The included Lock Plate also allows the adapter to be secure with minimal rotation and flex for an improved usage experience overall.

Extender RF 2x

Extends a super telephoto lens's focal length by 2x. For example, an 800mm focal length can become 1600mm.

Control Ring Mount Adapter EF-EOS R

With a control ring like those found on RF lenses, this adapter provides the same level of control with your EF and EF-S lenses and supports the same setting configuration regardless of lens.

Power Zoom Adapter PZ-E2 [COMPATIBLE WITH RF24-105MM F/2.8L IS USM Z ONLY]

Experience swift and precise control over your zoom on your camera with the Power Zoom Adapter PZ-E2. It allows customisation of zoom speed via a dial, and can be easily attached or detached from the lens without any special tool. Remote control of the zooming can also be achieved using Camera Connect App or EOS Utility software. Furthermore, the USB-C terminal allows external power using the USB Power Adapter PD-E1 for extended usage.

IMAGE SENSOR	
Туре	Approx. 24.1 megapixels, full-frame (approx. 36.0 × 24.0 mm) CMOS sensor
RECORDING SYSTEM	
Pixels recorded Recording media	RAW, C-RAW, HEIF, JPEG Large (6000 × 4000); HEIF, JPEG Medium (3984 × 2656); HEIF, JPEG Small 1 (2976 × 1984); HEIF, JPEG Small 2 (2400 × 1600 2 memory cards - Card slot 1: CFexpress (Type B, 2.0 compatible); Card slot 2: SD, SDHC, SDXC (UHS-II compatible)
IMAGE PROCESSING DURING	
Picture style	Auto, Standard, Portrait, Landscape, Fine Detail, Neutral, Faithful, Monochrome, User Defined 1–3
White balance	Auto (Ambience priority), Auto (White priority), Preset (Daylight, Shade, Cloudy, Tungsten light, White fluorescent light, Flash), Custom (5 Settings), Colour temperature setting (approx. 2500–10000 K)
Image correction	Auto Lighting Optimizer, Highlight Tone Priority, Lens Aberration Correction
AUTOFOCUS	
Focus method	Dual Pixel CMOS AF II
AF method Available AF positions	Spot AF, 1-point AF, Expand AF area (above / below / left / right or around), Flexible Zone AF 1 / 2 / 3, Whole area AF, Eye Control AF [Stills] Max. 4779, [Videos] Max. 3969
Available AF areas when	[Stills] Max. 1053
automatically selected	[Videos] Max. 819
Subject detection	People: Body, head, face, eyes Animal (Dogs/cats/birds): Entire body, face, eyes Vehicles (Motorsports cars or motorcycles): Spot detection, entire vehicle, specific/important parts
Touch & drag AF	Not available
AF operation	[Stills] One-Shot AF. Servo AF (default); [Video] One-Shot AF, Movie Servo AF
Focusing brightness range	[Stills] EV -7.5 to 20; [Video] EV -4.5 to 20 Using RF f/1.2 lens without a Defocus Smoothing (DS) coating, center AF point, at 23°C / 73°F, ISO 100, One-Shot AF (and 29.97 fps for video only
Focus bracketing	Available
EXPOSURE CONTROL	
Metering mode	[Stills] Evaluative, Partial, Spot, Center-weighted average [Video] Evaluative (when faces are detected), Center-weighted average (when no faces are detected/when set to Canon Log 3)
Shutter speed	[Stills] Mechnicial shutter / Electronic 1st-curtain: 30 - 1/8000, Electronic shutter: 30 - 1/64000 [Video] P/Av: 1/25* - 1/4000, Tv/M: 1/8* - 1/4000
Shooting mode	* Varies by shooting mode and frame rate Fv, P, Tv, Av, M, BULB, C1, C2, C3
ISO speed	[Stills] ISO 100-102400, expandable to L (ISO 50), H (ISO 204800)
(recommended exposure index)	[Video] ISO 100-25600 expandable to H (ISO 102400)
Exposure compensation	[Stills] Manual: ±3 stops in 1/3- or 1/2-stop increments, AEB: ±3 stops in 1/3- or 1/2-stop increments; [Video] ±3 stops in 1/3- or 1/2-stop increment
HDR shooting Multiple exposures	[Stills] HDR Mode, HDR PQ; [Video] HDR PQ Available
DRIVE SYSTEM	Available
Continuous shooting speed IMAGE STABLIZATION	Mechanical / Electronic 1st curtain shutter: Max. approx. 12 fps; Electronic shutter: Max. approx. 30 fps
In-body IS MOVIE RECORDING	Supported

IMAGE SENSOR	
Туре	Approx. 24.2 megapixels, full-frame (approx. 36.0 × 24.0 mm) CMOS sensor
RECORDING SYSTEM	
Pixels recorded	RAW, C-RAW, HEIF, JPEG Large (6000 × 4000); HEIF, JPEG Medium (3984 × 2656); HEIF, JPEG Small 1 (2976 × 1984); HEIF, JPEG Small 2 (2400 × 160
Recording media	2 memory cards - 2x SD, SDHC, SDXC (UHS-II compatible)
IMAGE PROCESSING DURING	SHOOTING
Picture style	Auto, Standard, Portrait, Landscape, Fine Detail, Neutral, Faithful, Monochrome, User Defined 1–3
White balance	Auto (Ambience priority), Auto (White priority), Preset (Daylight, Shade, Cloudy, Tungsten light, White fluorescent light, Flash), Custom, Colour temperature setting (approx. 2500–10000 K)
Image correction	Auto Lighting Optimizer, Highlight Tone Priority, Lens Aberration Correction
AUTOFOCUS	
Focus method	Dual Pixel CMOS AF II
AF method	Spot AF, 1-point AF, Expand AF area (above/below/left/right or around), Flexible Zone AF 1/2/3, Whole area AF
Available AF positions	[Stills] Max. 4897; [Video] Max. 4067
Available AF areas when automatically selected	Max. 1053 zones
Subject detection	Auto People: Body, head, face, eyes (Auto/Right eye/Left eye) Animal (Dogs/cats/birds/horses): Entire body, face, eyes Vehicles (Motorsports cars or motorcycles/Aircraft/Trains): Entire vehicle, specific/important parts
Touch & drag AF	Available
AF operation	[Stills] One-Shot AF, Servo AF, AI Focus AF; [Video] One-shot AF, Movie Servo AF
Focusing brightness range	[Stills] EV -6.5 to 21; [Video] 4K: EV -4 to 21, Full HD: EV -4.5 to 21 Using RF f/1.2 lens without a Defocus Smoothing (DS) coating, center AF point, at 23°C / 73°F, ISO 100, One-Shot AF (and 29.97 fps for video or
Focus bracketing	Available
EXPOSURE CONTROL	
Metering mode	[Stills] Evaluative, Partial, Spot, Center-weighted average [Video] Evaluative (when faces are detected), Center-weighted average (when no faces are detected/when set to Canon Log 3)
Shutter speed	[Stills] Mechnicial shutter / Electronic 1st-curtain: 30 - 1/8000, Electronic shutter: 30 - 1/16000 [Video] P/Av: 1/25* - 1/8000, Tv/M: 1/8* - 1/8000
Shooting mode	* Varies by shooting mode and frame rate A+, Hybrid Auto, Special scene mode, Creative filters, Fv, P, Tv, Av, M, BULB, C1, C2, C3
ISO speed	[Stills] ISO 100-102400, expandable to L (ISO 50), H (ISO 204800)
(recommended exposure index)	[Video] ISO 100-25600 expandable to H (ISO 204800)
Exposure compensation	[Stills] Manual: ±3 stops in 1/3- or 1/2-stop increments, AEB: ±3 stops in 1/3- or 1/2-stop increments; [Video] ±3 stops in 1/3- or 1/2-stop increments
HDR shooting	[Stills] HDR Mode, HDR PQ; [Video] HDR PQ
Multiple exposures	Available
DRIVE SYSTEM	
Continuous shooting speed	Mechanical / Electronic 1st curtain: Max. approx. 12 fps; Electronic shutter: Max. approx. 40 fps
IMAGE STABLIZATION	
In-body IS	Supported
MOVIE RECORDING	
Movie recording size	6K RAW* (6000 x 3374), 3.7K RAW* (3744 x 2106), 4K UHD (3840 x 2160), FHD (1920 x 1080)
Frame rate	* via HDMI output on compatible external recording devices 6K RAW: 59.94p / 50.00p / 29.97p / 25.00p / 23.98p 3.7K RAW: 59.94p / 50.00p / 29.97p / 25.00p / 23.98p 4K UHD: 59.94p / 50.00p / 29.97p / 25.00p / 23.98p Full HD: 179.82p / 150.00p / 119.88p / 100.00p / 59.94p / 50.00p / 29.97p / 25.00p / 23.98p
Movie recording modes	A+, Special scene mode (HDR movie), Creative filters, P, Tv, Av, M, C1, C2, C3
Time code	Supported
Canon Log	Canon Log 3
Aspect markers	1:1, 4:5, 5:4, 9:16, 2.35:1
Video exposure tools	Zebra setting, False colour
SCREEN	
Туре	Vari-angle, TFT colour, LCD touch screen, 3.0 inch (3:2) with approx. 1.62 million dots
VIEWFINDER	
Туре	OLED Electronic Viewfinder, 0.50 inch with approx. 3.69 million dots
INTERFACE	
Digital terminal	SuperSpeed Plus USB (USB 3.2 Gen 2) equivalent, USB Type-C
Built-in Webcam/Live-stream support (UAC/UVC)	Available
HDMI micro OUT terminal	Type D (auto switching of resolution) 3.5mm diameter stereo mini-jack
External microphone IN terminal Remote control terminal	5.5mm alameter stereo mini-jack E3-type terminal supported
Wireless remote control	Compatible with Wireless Remote Control BR-E1
Headphone	3.5mm diameter stereo mini-jack
Multi-function shoe	Available
WIRELESS FEATURES	
	IEEE 802.11b/g/n/a/ac equivalent
Wi-Fi	Bluetooth Specification Version 5.0 compliant (BLE)
Bluetooth	
Bluetooth POWER	
Bluetooth POWER Battery DIMENSIONS AND WEIGHT	Battery Pack LP-E6N / LP-E6
Wi-Fi Bluetooth POWER Battery DIMENSIONS AND WEIGHT Dimensions (W×H×D) (CIPA compliant)	

EOS R

IMAGE SENSOR	
Туре	Approx. 30.3 megapixels, full-frame (approx. 36.0 × 24.0
RECORDING SYSTEM	
Pixels recorded	RAW, C-RAW, JPEG Large (6720 × 4480); JPEG Medium
Recording media	1 memory card - SD, SDHC, SDXC (UHS-II compatible)
IMAGE PROCESSING DURING	SHOOTING
Picture style	Auto, Standard, Portrait, Landscape, Fine Detail, Neutro
White balance	Auto (Ambience priority), Auto (White priority), Preset (E Colour temperature setting (approx. 2500–10000 K)
Image correction	Auto Lighting Optimizer, Highlight Tone Priority, Lens Ab
AUTOFOCUS	
Focus method	Dual Pixel CMOS AF
AF method	Face+Tracking (Eye Detection AF selectable), 1-point Al Large Zone AF (vertical/horizontal)
Available AF positions	Max. 5,655
Available AF areas when	Max. 143
automatically selected	
Subject detection	People: Face, eye
Touch & drag AF	Available
AF operation	[Stills] One-Shot AF, Servo AF; [Video] One-shot AF, Mo
Focusing brightness range	[Stills] EV -6 to 18; [Video] EV -4 to 18 Using RF f/1.2 lens without a Defocus Smoothing (DS) cod
Focus bracketing	Available
EXPOSURE CONTROL	
Metering mode	[Stills] Evaluative, Partial, Spot, Center-weighted average [Video] AF point-linked Evaluative (for Face detection +
Shutter speed	[Stills] 30 - 1/8000
	[Video] 1/8* - 1/4000 * Varies by shooting mode and frame rate
Shooting mode	A+, Fv, P, Tv, Av, M, BULB, C1, C2, C3
ISO speed	[Stills] ISO 100-40000, expandable to L (ISO 50), H (ISO
(recommended exposure index)	[Video] ISO 100-12800 expandable to H (ISO 102400)
Exposure compensation	[Stills] Manual: ±3 stops in 1/3- or 1/2-stop increments, AB
HDR shooting	[Stills] HDR Mode; [Video] HDR Movie
Multiple exposures	Available
DRIVE SYSTEM	
Continuous shooting speed	One Shot AF: Max. approx. 8 fps, Servo AF: Max. approx
IMAGE STABLIZATION	
In-body IS	Not supported

Available AF positions	[Stills] Max. 4503; [Video] Max. 3713
Available AF areas when	[Stills] Max. 651; [Video] Max. 527
automatically selected	
Subject detection	People: Body, head, face, eyes (Right eye/Left eye) Animal (Dogs/cats/birds): Entire body, face, eyes
	Vehicles (Motorsports cars or motorcycles): Entire vehicle, spec
Touch & drag AF	Available
AF operation	[Stills] One-Shot AF, Servo AF; [Video] One-shot AF, Movie Ser
Focusing brightness range	[Stills] EV -4.0 to 20; [Video] EV -3.5 to 20 Using RF f/1.2 lens without a Defocus Smoothing (DS) coating, c
Focus bracketing	Available
EXPOSURE CONTROL	
Metering mode	[Stills] Evaluative, Partial, Spot, Center-weighted average
	[Video] Evaluative (when faces are detected), Center-weighted
Shutter speed	[Stills] Mechanical / Electronic 1st-curtain: 30 - 1/4000, Electro
	[Video] Auto exposure: 1/25* - 1/4000, Manual exposure: 1/8* * Varies by shooting mode and frame rate
Shooting mode	A+, Special scene mode, Creative filters, Fv, P, Tv, Av, M, BULB, C1, C
ISO speed	[Stills] ISO 100-32000, expandable to H (ISO 51200)
(recommended exposure index)	[Video] ISO 100-12800 expandable to H (ISO 25600)
Exposure compensation	[Stills] Manual: ±3 stops in 1/3- or 1/2-stop increments, AEB: ±3 stops
HDR shooting	[Stills] HDR Mode, HDR PQ; [Video] HDR PQ
Multiple exposures	Available
DRIVE SYSTEM	
Constant and a set of a second	Mechanical / Electronic 1st curtain shutter: Max. approx. 15 fp
Continuous shooting speed	rechanicary Electronic relicontain shorter. Max. approx. 19 fp

ULTRA-WIDE ANGLE	RF16mm f/2.8 STM
Lens type	Canon RF Lens
Focal length & maximum aperture	16mm f/2.8
Lens construction	9 elements in 7 groups
Diagonal angle of view	108°10′
Focusing actuator	STM
Minimum focusing distance	0.13m
Optical Image Stabilization (OIS)	-
OIS + In-Body IS	Up to 5.5 stops (CIPA Standards)
Aperture blades	7
Filter size	43mm
Maximum diameter & length	Ø69.2 x 40.2mm
Weight	Approx. 165g

Focus breathing correction Not supported

WIDE ANGLE	RF28mm f/2.8 STM
Lens type	Canon RF Lens
Focal length & maximum aperture	28mm f/2.8
Lens construction	8 elements in 6 groups
Diagonal angle of view	75°
Focusing actuator	Gear-type STM
Minimum focusing distance	0.23m
Optical Image Stabilization (OIS)	-
OIS + In-Body IS	Up to 7 stops (CIPA Standards)
Aperture blades	7
Filter size	55mm
Maximum diameter & length	Ø69.2 × 24.7mm
Weight	Approx. 120g
Focus breathing correction	Supported

ULTRA-WIDE ANGLE ZOOM	RF-S10-18mm f/4.5-6.3 IS STM
Lens type	Canon RF Lens
Focal length & maximum aperture	10-18mm f/4.5-6.3
Lens construction	12 elements in 10 groups
Diagonal angle of view	107°30′ - 74°20′
Focusing actuator	Leadscrew-type STM
Minimum focusing distance	0.14m (AF, f=10-18mm) 0.086m (MF, f=10mm)
Optical Image Stabilization (OIS)	Up to 4 stops (CIPA Standards)
OIS + In-Body IS	Up to 6 stops (CIPA Standards)
Aperture blades	7
Filter size	49mm
Maximum diameter & length	Ø69 × 44.9mm
Weight	Approx. 150g
Focus breathing correction	Supported

ULTRA-WIDE ANGLE ZOOM	RF10-20mm f/4L IS STM
Lens type	Canon RF Lens
Focal length & maximum aperture	10-20mm f/4
Lens construction	16 elements in 12 groups
Diagonal angle of view	130°25′ - 94°
Focusing actuator	Leadscrew-type STM
Minimum focusing distance	0.25m

Optical Image Stabilization (OIS)	Up to 5 stops (CIPA Standards)
OIS + In-Body IS	Up to 6 stops (CIPA Standards)
Aperture blades	9
Filter size	Gelatin filter (rear)
Maximum diameter & length	Ø83.7 × 112mm
Weight	Approx. 570g
Focus breathing correction	Supported

ULTRA-WIDE ANGLE ZOOM	RF14-35mm f/4L IS USM
Lens type	Canon RF Lens
Focal length & maximum aperture	14-35mm f/4
Lens construction	16 elements in 12 groups
Diagonal angle of view	114°00′ - 63°00′
Focusing actuator	Nano USM
Minimum focusing distance	0.20m
Optical Image Stabilization (OIS)	Up to 5.5 stops (CIPA Standards)
	Lip to 7 stops

	(
OIS + In-Body IS	Up to 7 stops (CIPA Standards)
Aperture blades	9
Filter size	77mm
Maximum diameter & length	Ø84.1 × 99.8mm
Weight	Approx. 540g
Focus breathing correction	Supported

ULTRA-WIDE ANGLE ZOOM	RF15-30mm f/4.5-6.3 IS STM
Lens type	Canon RF Lens
Focal length & maximum aperture	15-30mm f/4.5-6.3
Lens construction	13 elements in 11 groups
Diagonal angle of view	110°30′ - 71°35′
Focusing actuator	Leadscrew-type STM
Minimum focusing distance	0.28m (AF, All zoom range) 0.128m (MF, f=15mm)"
Optical Image Stabilization (OIS)	Up to 5.5 stops (CIPA Standards)
OIS + In-Body IS	Up to 7 stops (CIPA Standards)
Aperture blades	7
Filter size	67mm
Maximum diameter & length	Ø76.6 × 88.4mm
Weight	Approx. 390g
Focus breathing correction	Supported

ULTRA-WIDE ANGLE ZOOM	RF15-35mm f/2.8L IS USM
Lens type	Canon RF Lens
Focal length & maximum aperture	15-35mm f/2.8
Lens construction	16 elements in 12 groups
Diagonal angle of view	110°30′-63°00′
Focusing actuator	Nano USM
Minimum focusing distance	0.28m
Optical Image Stabilization (OIS)	Up to 5 stops (CIPA Standards)
OIS + In-Body IS	Up to 7 stops (CIPA Standards)

	(CIPA Standards)
Aperture blades	9
Filter size	82mm
Maximum diameter & length	Ø88.5 × 126.8mm
Weight	Approx. 840g
Focus breathing correction	Supported
